Titl	RERIMENT  Le  LIPA  ADVACED SUB ARRAY PROBLEM  Description  LIPA  CELIO  LIPA  CELI	
	ADVACED SUB ARRAY PROBLEM	(B)3C
1 E	$ \begin{array}{cccccccccccccccccccccccccccccccccccc$	FIB 13 C
3C5E701 B	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	^
b	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the	,5E101
1829	distance of a player from basket for N shots. The index of array represents the position of the player. Score is calculated by multiplying the position with the distance from the basket.	
0147825	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	(A)B)
42	Note:	\
323C5K1	* A subarray is a contiguous part of array.	4)
	* Assume 1 based indexing.	13051
145	* The array contains both negative and positive values.	
5E707 45'	* Assume the player is standing on a cartesian plane.	101 K
	Input Format	10,
KNB13CE.	- input1:An integer value N representing the number of shots made by the player	
42	- input2 : An integer K representing the size of subarray	1823C
1	- input3 : An array of integers	ي
